TECHNICAL-VISION

I believe the future of game development lies in the synergy between AI and creative engineering. My focus is on building teams and systems leveraging LLMs, agentic automation, and data-driven approach to deliver unprecedented player experiences

EXPERIENCE (9+ Years)

Team Lead

ArdentInfo Solutions | Sep 2021 – Feb 2025 | Chandigarh, India

- **Projects:** *Rule of 3* ([Web](#)), *Race for The White House* (Multiplayer Strategy Game) ([Demo-Video](#))
- **Roles:** Leadership | Delivery | Process Optimization | Stakeholder Collaboration | AI-Powered Workflows:
- **Responsibilities:** - Led technical development of a narrative e-learning platform / multiplayer game, mentored two teams of 4
 - Successfully delivered 2 titles that expanded the company's portfolio by 20%. Optimized development workflows through CI/CD pipelines and custom editor tools, achieving a 20% reduction in build times and 60% decrease in coding effort
 - Implemented SOLID principles improving team throughput by 15%, managed LiveOps/DLCs via Addressables
 - Collaborated with stakeholders translating business requirements into technical documentation, reducing revision cycles by 30% and accelerating time-to-market by one month. Championed AI-augmented development by training teams in Claude/Cursor pair programming and sharing key learnings resulting in a 40% reduction in boilerplate code.

Unity Team Leader

Webzool Creative Inc. | Oct 2019 – Jul 2021 | California, USA

- **Projects:** *RS Fun* ([iOS](#)) ([Web](#)), *F7 Fun* (Casino Games) ([iOS](#))
- **Roles:** Technical Architecture | Team Leadership | Development Efficiency | Live Operations
- **Responsibilities:** - Enhanced team productivity by creating custom editor tools and streamlined UI workflows.
 - Designed/Implemented a Slot/Keno engine using Design Patterns/Advanced Unity Concepts boosting developer output by 25% and reducing memory usage by 15%. Led a 14-member team to successfully deliver mobile games with on-time delivery
 - Rapidly adapted GitHub Actions to cut build times by 20%. Established LiveOps capabilities through real-time data collection via Info APIs, enabling progressive builds that significantly improved user experience.

Game Developer

Lucky Strike Games | Mar 2018 – Aug 2019 | Bangalore, India

- **Projects:** *Bingo Blast* (Card Game) ([Android](#))
- **Roles:** Performance Optimization | Technical Debt Reduction
- **Responsibilities:** - Overhauled the core Bingo framework, decreasing tech debt by 15%
 - Reduced GC spikes by 40% via object pooling, cut asset bundle sizes by 35%. Solved bugs improving functionality by 10%

Developer & Co-Founder

Gaming Dronzz | Oct 2015 – Present | Jammu, India

- **Projects:** *Hyike Games* ([Android](#)), *My CCA* ([Govt.-Android](#)), *Ludo Ultimate* ([PC-Android](#)), *Resume as a Game* ([Link](#)), *Match-o-Mania* ([Web](#)), *Balpreet* ([Web](#)), *DUI Cop Stop*, *Universal News Timeline* ([Android](#)), *Govt. Pension System* (Standalone)
- **Roles:** Multiplayer Systems | LiveOps Management | Web Development | AI Integration
- **Responsibilities:** Engineered real-time multiplayer gameplay using Photon. Developed efficient state management systems using compression algorithms. Built dynamic single-page applications with vanilla JS, HTML5, and CSS3. Innovated website navigation by developing an AI agent to deliver precise, instant search results and seamless user guidance.

A.I & INNOVATION

- Working on creating a film-script evaluation AI agent using Amazon Bedrock and Lambda functions (reducing review time by 40% approximately), Advocate for Agentic AI leveraging Copilot, Claude, Cursor for acceleration via pair programming
- Working knowledge of Fuzzy matching algorithms along with training AI Models for result driven output
- Expert at writing AI prompts for getting the most out of AI Agents

SKILLS

Programming & Patterns – C#, OOP, SOLID, Performance/Memory Optimization, JavaScript, MVC, Observer, Factory, Dependency Injection, Strategy, Refactoring Legacy Code, DSA

Multiplayer – Photon PUN2/Fusion, Playfab, Mirror

VC & DevOps – Git, Sourcetree, CI/CD Pipelines, Github Actions

Project Management – JIRA, Slack, SCRUM, AGILE Methodologies

Soft Skills – Leadership, Mentorship, Collaboration

UNITY EXPERTISE

Architecture, Addressables, Debugger, Scriptable Objects, Custom Inspectors, Memory Profiler, DoTween, IL2CPP, UI Toolkit, Shader Graphs, GPU/CPU Profiling, URP, Occlusion Culling, LOD Groups, Cinemachine

EDUCATION

BCA/MCA, University of Jammu, India, 2012-15

OTHER CAPABILITIES

Phaser.JS (Intermediate), AR / VR(Beginner), Contextual AI Prompt Specialist, LLM Training
